Chapter G is looking volunteers for the **25th Annual Midnight Ride** (August 19, 2011) in the following areas:

1. **Lead Group Riders** - This group rides ahead of the main group to make sure lanes are safe and any hazards are removed, and also helps, if needed, to get the main group thru intersections.
2. **Tailgunners** - Tailgunners follow the ride to assist other riders with broken down bikes or accidents. We have first responders among the group to handle medical emergencies and a tow truck to pick up bikes. You would just need to stay to coordinate all efforts.
3. **Rockford Parking Lot** - We need about 5 people to line up bikes for the ride. You would need to be there by 8 pm to start lining bikes up. When we all leave, pick up cones and put in vehicle that is left behind for pick up on the way back on Sunday. Then if you want, join the ride in Alma.

May is motorcycle awareness month, and along with the GWRRA MAD, (Motorist Awareness Division), we need to think about what we can do to make riding our bikes safer. All of us need to come up with some ideas on how you make the general public notice us while riding, and bring those ideas to the gathering and we will discuss them. The thing today is the distracted driver, cell phones, eating and drinking while driving, GPS units, and etc. We need to be aware of our surroundings and take action when we see something going on. Don't sit in someone's blind spot. If you notice someone talking on a phone, make them aware that you are around them. We need to make them see us at all the times. With all the different size and types of motorcycles, we want to be seen so that we can ride safe each time we are out riding. Also, remember to increase your odds of not getting into an accident by taking a safety class either thru GWRRA or any other safety foundation

Dear Fellow Motorcycle Enthusiasts;

I am trying to pass information forward regarding Motorcycle Safety Awareness Month during May in Michigan in case you were unaware of the event. Michigan Secretary of State Ruth Johnson will be hosting a press conference Tuesday May 3, 2011 at 4:00 p.m. in front of the State Capitol in downtown Lansing. This site and time is different from the previous years events and is also different from the original May 4th date previously announced. Reserved metered parking will be available in front of the State Capitol for the event. Questions may be forwarded to Laura Lehman at the Michigan Department of State. Her email is [lehmanl@michigan.gov](mailto:lehmanl@michigan.gov) or she may be reached by phone at 517 373-0221. If you are bringing a group to the event, she is interested in knowing how many will be attending.

Alternatively, I myself plan on being at the Union Missionary Baptist Church at the corner of Martin Luther King Blvd and St. Joseph St just off I-496 at exit 5 about 3:00 p.m. that day and I will lead anyone unfamiliar with the downtown Lansing area over to the Capitol about a mile and a half away about 3:30 p.m.

## Just Common Sense

Without the protection provided by an automobile, motorcycles pose a greater threat of significant personal injury. The severity of the potential injury rises exponentially as speed increases and with today's powerful motorcycles you can quickly find yourself traveling at high speeds with little to no effort. Proper safety

guidelines should always be followed no matter what type of motorcycle you're riding or how fast you plan to travel. There is no replacement for adequate precautions.

Many people may assume that because they're wearing a helmet the rest of their body should be OK as well. Unfortunately this is not the case and many motorcyclists find themselves learning this the hard way, year after year. When you're riding it's important to go the extra mile to keep your ride as safe as possible. Don't settle for just the helmet. Invest in the proper gloves, footwear, and clothing for improved resistance in the event of a fall.

### FULL GEAR

**HELMET.** Most important piece of protective gear a rider can use. Protects against head injury, windblast, cold, and flying objects. Full-face helmet recommended.

**FACESHIELD.** "Saves face." Any rider who's been hit in the face by stones, insects, or debris can tell you the benefits.

**GLOVES.** Keep hands comfortable, functional and protected. Come in infinite variety for all seasons.

**JACKET AND PANTS.** Long-sleeved and trousers resist abrasion and protect against sunburn, windburn, dehydration, or hypothermia. Light colors or reflectivity increase a rider's visibility.

**BOOTS.** Provide protection against foot and ankle injuries and give you a good grip on footpegs or road surfaces.

**BOTTOM LINE:** Proper riding gear protects in the event of an accident and minimizes injuries, while allowing you to enjoy the sport in comfort.

### FOOL'S GEAR

**HEAD.** Considered precious by knowledgeable riders, never exposed by the prof's. Whinnily in view, allows immediate identification of untrained person not using his. Hand out rider education info on sight.

**EYES, EARS, AND FACE.** Known to experienced riders as "bug and garbage collectors." Common "bare face" symptoms include windblast-deafening and deformed, narrow-slit, watery eyes.

**HANDS** are natural (not for long). Known to seize into curled position when exposed to cold, not genetically evolved to withstand abrasion.

**BARE LIMBS.** A phenomenon seen only on riders deemed impervious to any unavoidable accident or inclement weather. Subject to ridicule in riding circles.

**FLIP FLOPS.** Terminology for what sandals, toes and feet do upon contact with road surfaces, shift lever, brake pedal, foot pegs, or windblasts.

**BOTTOM LINE:** Fool's gear identifies an untrained rider. Learn how to avoid embarrassment, ridicule, and injury, while gaining skills and knowledge by contacting the RiderCourse nearest you.
